

How To Avoid Listserv Flooding

First, publish the information you wish to send on the public internet. For instance:
http://ashiant.net/unix/avoiding_listserv_flooding.pdf

Then create an html file that has an IFrame with the document you wish to share, as a precaution you may also want to include a link to the file in the IFrame. Like the example below:

```
<IFRAME src="http://ashiant.net/unix/avoiding_listserv_flooding.pdf"
width="100%" height="600">
  [Your user agent does not support frames or is currently
  configured not to display frames. However, you may visit
  <A href="http://ashiant.net/unix/avoiding_listserv_flooding.pdf">
  the related document.</A>]
</IFRAME>
```
